
LEADREACH AI IFSC CORP.

Live Web-Application Production Demonstration Script

Investor-Facing Scripted Walkthrough for VC Partners, LPs & Investment Committee Members

DOCUMENT	Technical Architecture v2.4
	Confidential - Investor Use Only
DURATION	30-Minute Live Demonstration
	leadreach.ai - Production (Command Tier)
DATE	March 2026

DEMO HIGHLIGHTS

- 8 autonomous AI agents replacing 8-12 SDRs
- 17+ channels searched simultaneously
- End-to-end pipeline in under 15 minutes
- \$0.04 cost per qualified lead vs. \$50-200 human
- 78-85% scoring accuracy alignment

CONFIDENTIAL

Section 1: Demo Overview

Item	Detail
Duration	30 minutes
Audience	VC partners, LPs, investment committee members
Objective	Demonstrate end-to-end autonomous lead generation pipeline in real-time
Key Message	LeadReach replaces 8-12 SDRs with 8 AI agents working 24/7 across 17+ channels
Demo Environment	Production instance at leadreach.ai with Command-tier account

Section 2: Pre-Demo Checklist

#	Item	Status	Notes
1	Verify platform login	Must be ready	Use demo@leadreach.ai account
2	Clear existing demo data	Must be fresh	Use /api/data/clear endpoint
3	Seed demo data	Must be realistic	Use /api/seed endpoint
4	Verify AI agents online	All 8 must show Active	Check agents view
5	Verify channel health	11+ Active channels	Check AgentReachChannel status
6	Pre-load campaign	"Series A SaaS Startups"	Create before demo
7	Test ICP profile	Pre-configured	B2B SaaS, 50-500 employees
8	Screen resolution	1920x1080 recommended	Full-screen browser
9	Backup screenshots	If live demo fails	Pre-captured for each step
10	Internet connectivity	Stable connection	Hardline preferred over WiFi

Section 3: Demo Script - Phase 1: Platform Introduction (5 min)

"Welcome to LeadReach, the world's first fully autonomous AI-powered lead generation platform. What you're looking at is our production dashboard. Notice the eight AI agents in the left sidebar. Each one is a specialized AI worker with its own memory, skills, and channel assignments. Together, they form an autonomous sales development team that works 24/7 across 17 internet channels."

Step 1: Dashboard Overview

- Navigate to /app (Dashboard view)
- Highlight: Total leads, pipeline stages, agent status
- Key stat: "Our demo account currently shows [X] leads across [Y] pipeline stages"
- Talking Point: 65% of sales rep time is wasted on manual prospecting. LeadReach automates this entirely.

Step 2: Agent Roster

- Navigate to Agents view
- Click each agent to show its profile, skills, and channel assignments
- Highlight: Orchestrator coordinates, Discovery searches 7 channels, Qualification uses 3 scoring frameworks
- Talking Point: Each agent has episodic, semantic, and procedural memory that improves over time.

Section 4: Demo Script - Phase 2: Live ICP Builder (7 min)

"Let's start by telling the AI who our ideal customer is. In a traditional sales stack, this would require hours of research and manual list building. With LeadReach, we simply describe our ICP in natural language."

Step 3: Open ICP Builder

- Navigate to ICP view
- Enter ICP criteria: "B2B SaaS companies, 50-500 employees, Series A or B funding, US-based, using Stripe or AWS"
- Show AI processing the ICP in real-time

Dimension	Weight	Description
Firmographic	25%	Company size, industry, location, revenue
Technographic	15%	Technology stack, tools, infrastructure

Psychographic	15%	Values, culture, decision-making style
Behavioral	15%	Engagement patterns, buying signals
Situational	15%	Timing, triggers, current events
Economic	15%	Budget indicators, funding, growth trajectory

Tier	Score Range	Action
Ideal	80+	Immediate outreach with personalized sequence
Strong	65+	Priority outreach with targeted messaging
Moderate	45+	Nurture campaign with periodic engagement
Weak	25+	Deprioritize or exclude from current campaign

Step 4: ICP Results

- Show ICP profile with weighted dimensions
- Demonstrate: "The AI has identified that companies using Stripe + AWS with 50-200 employees in SaaS are our strongest ICP match"
- Transition: "Now let's put this ICP to work"

Section 5: Demo Script - Phase 3: Autonomous Prospect Discovery (10 min)

"This is where the magic happens. I'm going to launch a prospect discovery campaign using the ICP we just built. Watch as our eight agents work together autonomously across multiple channels simultaneously."

Step 5: Launch Campaign

- Navigate to Campaigns view
- Create new campaign: "Series A SaaS Prospects Q2 2026"
- Select the ICP profile created in Step 3
- Click "Run Full Pipeline"

Step 6: Watch Agents Work

Stage	Status	Description
Discovery	Running	Multi-channel prospect search across 7 channels

Enrichment	Pending	Firmographic, technographic, and contact data enrichment
Qualification	Pending	BANT, MEDDIC, and ICP composite scoring
Outreach	Pending	Personalized message generation and sequencing

Navigate to Prospect Discovery chat view

Type: "Find me 10 SaaS companies that raised Series A in the last 6 months"

Watch multi-channel search execute across LinkedIn, GitHub, Twitter, Exa Search simultaneously

Talking Point: Notice the agents are searching 7 channels simultaneously. A human SDR could only search one channel at a time.

Step 7: Review Discovery Results

Framework	Dimensions	Purpose
BANT	Budget, Authority, Need, Timeline	Qualify readiness to buy
MEDDIC	Metrics, Economic Buyer, Decision Criteria, Decision Process, Identify Pain, Champion	Enterprise deal qualification
ICP Composite	Firmographic + Technographic + Psychographic + Behavioral + Situational + Economic	Ideal customer fit scoring

Section 6: Demo Script - Phase 4: AI Outreach & Pipeline (5 min)

"Now let's see the Outreach Composer generate personalized messages for our top-scored leads. Each message is tailored to the prospect's specific context using one of four outreach frameworks."

Step 8: AI Outreach Generation

Navigate to Outreach view

Select top 5 scored leads

Generate outreach sequences using "Problem-Proof-Ask" framework

Show personalized email drafts with company-specific details

Step 9: Pipeline Management

Stage	Description	AI Action
Hot	High ICP + BANT score, ready for outreach	Immediate personalized outreach
Warm	Moderate scores, needs nurturing	Automated drip sequence
Cold	Low scores, not current fit	Periodic re-evaluation
Follow-up	Previous contact, needs re-engagement	AI-scheduled touchpoints

Talking Point: Our AI Setter can qualify inbound leads and book appointments 24/7, achieving 30-40% conversion rates versus 10-20% for human setters.

Section 7: Demo Script - Phase 5: Reports & ROI (3 min)

"Finally, let's look at the analytics our Report Generator produces. Every campaign generates actionable insights with specific recommendations."

Step 10: Report Generation

Navigate to Reports view

Generate pipeline report for the demo campaign

Show AI insights: opportunity identification, risk assessment, trend analysis, actionable recommendations

Metric	LeadReach AI	Traditional SDR Team
Monthly Cost	\$399 (Command tier)	\$40,000-\$80,000 (8-12 SDRs)
Leads/Month	10,000+ qualified	500-2,000 qualified
Cost per Qualified Lead	~\$0.04	\$50-\$200
Channel Coverage	17+ simultaneous	1-2 sequential
Operating Hours	24/7/365	40 hrs/week
Time to Pipeline	<15 minutes	2-3 weeks

Section 8: Closing & Q&A Preparation

Closing Statement

"What you've just seen is an 8-agent AI workforce that replaces 8-12 human SDRs at one-tenth the cost. The entire pipeline from ICP definition to qualified outreach took under 15 minutes. The same process with a human team would take 2-3 weeks. LeadReach is not another sales tool. It's the autonomous sales team of the future."

Anticipated Questions & Responses

Question	Response
How accurate is the AI scoring?	Our BANT/MEDDIC/ICP composite scoring achieves 78-85% alignment with human sales manager evaluations in our benchmark tests.
What happens when channels block you?	Our 4-tier fallback architecture ensures zero-result resilience. When a channel blocks us, we automatically cascade to alternative extraction methods.
How do you handle data privacy?	We only extract publicly available data. Our architecture is compliance-by-design with GDPR and CCPA considerations built in.
What's the AI cost per lead?	At Command tier, the blended AI cost per qualified lead is approximately \$0.04, compared to \$50-\$200 for human SDR-generated leads.
Can customers customize the agents?	Yes. Enterprise customers can customize agent personas, scoring frameworks, outreach templates, and channel priorities.
What's your competitive moat?	18-24 months of engineering to replicate our 8-agent architecture, plus compounding data advantage from agent memory, plus 17+ channel extraction infrastructure.
